OFFOXY ROAD

NOISE

The Contractor is to check and verify all building and site dimensions, levels and sewer level levels at connection points before work starts. The Contractor is to comply in all respects with current Building Legislation, British Standard Specifications, Building Regulations, Construction (Design & Management) Regulations, Party Wall Act, etc. whether or not specifically stated on this drawing. This drawing must be read with and checked against any structural, geotechnical or other specialist documentation provided. This drawing is not intended to show details of foundations, ground conditions or ground contours. Each area of ground relied upon to support any structure depicted (including drainage) must be investigated by the Contractor. A suitable method of foundation should be provided allowing for existing ground conditions. Any suspect or flint ground, contamination on or within the ground, should be further investigated by a suitable expert. Any earthwork construction shown indicate typical slopes for guidance only it should be further investigated by a suitable expert. Where existing trees are to be retained they should be subject to a full Arboricultural inspection for safety. All trees are to be planted so as to ensure they are a minimum of 5 metres from buildings and 2 metres from drainage and services. A suitable method of foundation is to be provided to accommodate the proposed tree planting. Geoff Perry Associates Limited do not accept any responsibility for any losses (financial or otherwise) to any Client or third party arising out of the Client's (or its Developer or Contractor) but not limited thereto) non-compliance with above mentioned provisions. © This drawing is the property of Geoff Perry Associates Limited and may not be copied or used for any purpose other than that for which it is supplied without the express written authority of Geoff Perry Associates Limited.

This drawing illustrates a sketch proposal only and as such is subject to detailed site investigation including ground conditions / contaminants, drainage, design and planning / density negotiations. The layout may be based upon an enlargement of an o.s. sheet or other small scale plans and its accuracy will need to be verified by survey. Full risk assessment under CDM Regulations has not been undertaken.

nb. No account has been taken of any services laid on or around the boundaries of the site.

nb. This layout takes no account of any trees on or around the boundaries of the site.

Constraints Plan

NOTES:

1. This drawing is a sketch proposal only and as such is subject to detailed site investigation including ground conditions / contaminants, drainage, design and planning / density negotiations. The layout may be based upon an enlargement of an o.s. sheet or other small scale plans and its accuracy will need to be verified by survey. Full risk assessment under CDM Regulations has not been undertaken.
2. No account has been taken of any services laid on or around the boundaries of the site.
3. This layout takes no account of any trees on or around the boundaries of the site.

The Contractor is to check and verify all building and site dimensions, levels and sewer level levels at connection points before work starts. The Contractor is to comply in all respects with current Building Legislation, British Standard Specifications, Building Regulations, Construction (Design & Management) Regulations, Party Wall Act, etc. whether or not specifically stated on this drawing. This drawing must be read with and checked against any structural, geotechnical or other specialist documentation provided. This drawing is not intended to show details of foundations, ground conditions or ground contours. Each area of ground relied upon to support any structure depicted (including drainage) must be investigated by the Contractor. A suitable method of foundation should be provided allowing for existing ground conditions. Any suspect or flat ground, contiguously on or within the ground, should be further investigated by a suitable expert. Any earthwork constructions shown indicate typical slopes for guidance only & should be further investigated by a suitable expert. Where existing trees are to be retained they should be subject to a full Arboricultural inspection for safety. All trees are to be planted so as to ensure they are a minimum of 5 metres from buildings and 2 metres from drainage and services. A suitable method of foundation is to be provided to accommodate the proposed tree planting.
