Document Element: The proposed housing target, 5.17

Respondent: Mr Richard Evanson

Date received: 22/12/2022 via Web

Summary:

The government standard project management approach is Prince 2. The Business Case document details the full Business Case, showing why the project should be done, the costs, the expected benefits and timescales.

The business case is then checked throughout the lifetime of the project. Even projects that are started to comply with new legislation require justification.

The Business Case should be regularly reviewed during the project to check its continued business justification, this has clearly not been done and the impacting factors are shown on the attachment.

Change suggested by respondent:

The business case needs to be reviewed and the number of houses to be built should be reduced, thus removing a number of planned locations from the plan,

Legally compliant: Yes

Sound: No

Comply with duty: No

Appear exam: Appearance at the examination

Oral exam why: I believe the process of planning has been incomplete and unfair. The national guidelines have been misinterpreted and continually reviewed during the process. Local councilors have taken the easy route out, if it does not impact them they have happily taken the not in my back yard.
