Document Element: Policy SA3: Housing Allocations

Respondent: Mr Kevin Ellis

Date received: 24/05/2024 via Web

Summary:

Site reference 523

I refer to the development of the 49 dwellings at Wolverhampton Rd East

Poor infrastructure: Cheslyn Hay already has infrastructure problems in terms of there not having enough Doctors/ Pharmacies/Schools/Libraries etc

to sustain the current population of Cheslyn Hay let alone adding another 150-200 people to the list. There is not enough room/ services to support the current population of Cheslyn Hay let alone adding more people to the list. The schools are at their capacity for class sizes without adding more children to the list.

Change suggested by respondent:

Dangerous Road- Wolverhampton Rd East

There needs to be a clear plan for the road as there are currently many issues with Wolverhampton Rd East without adding an extra 150-200 people.

There are constant traffic lights restricting the flow of traffic and constant flooding to make the road even more dangerous. The bend in the road is horrific .

The utmost importance here is Cheslyn Hay residents safety and until a clear plan for the road is sorted no planning application should succeed.
