Document Element: Employment, 6.46

Respondent: Ms K Hodgkinson

Date received: 20/05/2024 via Web

Summary:

Although this is non- Green belt land it is high quality agricultural land. The land is directly behind St Leonard's First School. There will be significant noise & air pollution affecting the young children attending the school & the local residents who live in a close proximity to this site. The current biodiversity is immense & is home to newts, birds, bats, hedgehogs, insects & other animals.

Allocating this high quality agricultural land to development for warehouses is against the Government's policies mentioned in the Farm to Fork Summit 2024

Change suggested by respondent:

The site at M6 Junction 13 should be removed from the Local Plan as a potential employment site as it contravenes the NPPF (180) (b) which states we need to recognise the intrinsic character & beauty of the countryside NPPF (180)(d) minimise impacts on biodiversity

Legally compliant: No
