Document Element: Policy NB2: Biodiversity

Respondent: Mr John Marsh

Date received: 29/05/2024 via Web

Summary:

Again with my other comments, how on earth is bulldozing THREE LITERAL GREEN FIELDS supposed to support an enhance biodiversity. Why can't a single brownfield site be identified? Because its just easier for the planners to destroy a set of fields that we love to see. Perhaps the biodiversity they are talking about is just pidgeons, never mind any of the wildlife that currently lives in those fields.
