**Document Element:** Policy NB5: Renewable and low carbon energy generation

**Respondent:** Mr John Marsh

**Date received:** 29/05/2024 via Web

**Summary:**

I was an early adopter of driving an electric vehicle in 2020. South staffs council has introduced nothing in Wombourne to support or encourage the driving of electric vehicles. As usual its on working people like me to part with our own money to somehow save the environment. What they are prepared to do, however, is cut down a load of trees, bulldoze a three fields and add around 500 extra cars to our village. Very renewable and sustainable, especially with no train station or useful public transport links
