Document Element: Policy NB7: Managing flood risk, Sustainable urban Drainage Systems (SuDS) & water quality

Respondent: Mr John Marsh

Date received: 29/05/2024 via Web

Summary:

Again, another joke to see this written as policy and so flagrantly ignored in these plans. Poolhouse Road floods with even the slightest bit of rain. It is a natural dip and there is clearly a drainage issue. An area of flood risk is literally about 50 metres away from the junction of Bridgnorth Road. Bulldozing the fields removes all the natural drainage, so it can only get worse. When it floods, traffic is down to one lane and causes a traffic issue in the area.
