Document Element: Table 2: SWOT analysis

Respondent: Mrs Tanyha Marsh

Date received: 30/05/2024 via Web

Summary:

The strengths are generic, however the weaknesses will have a greater impact should further houses be built without the correct infrastructure.

The demographic imbalance is due to the nature of the village (Wombourne) and the residents it caters for. The job opportunities are not great enough to attract a younger demographic. The transport services are very very poor, there are very few reasonably priced or free social services that a younger person would require. That could assist with health, child, youth care and entertainment.
