**Document Element:** Policy SA5 - Employment Allocations

**Respondent:** Miss Fsyne Martin

**Date received:** 29/05/2024 via Web

**Summary:**

I Strongly Oppose this like I did The Planning Application 23/01080/OUTMEI (please see comments on this planning application which was apparently forgotten about and the date expired without an outcome. now this has been raised). The land ear marked for employment will be huge warehouses, on Grade 2 farmland, home to wildlife and endangered species. Footpaths and Bridle Paths behind a Primary School,,encroaching on a rural country village and countryside. Noise/Light/Air pollution will be detrimental. Air Pollution, the government are trying to tackle this with grants to councils to major health problems in the young and old.

I Strongly Oppose this like I did The Planning Application 23/01080/OUTMEI (please see comments on this planning application which was apparently forgotten about and the date expired without an outcome. now this has been raised). The land ear marked for employment will be huge warehouses, on Grade 2 farmland, home to wildlife and endangered species. Footpaths and Bridle Paths behind a Primary School,,encroaching on a rural country village and countryside. Noise/Light/Air pollution will be detrimental. Air Pollution, the government are trying to tackle this with grants to councils to major health problems in the young and old.

**Change suggested by respondent:**

Employment needs to be near towns where people can travel and reach easily. The road and transport networks are not set up for this here.

The land is perfect for growing crops when it's gone it's gone.

Flooding is also very bad in this area and will only make it worse in Stafford.

I can only see this will cause the council more issues in the future.

**Legally compliant:** No

**Sound:** No
