**Document Element:** Policy SA3: Housing Allocations

**Respondent:** Mrs Julie Slater

**Date received:** 20/05/2024 via Web

**Summary:**

Objections to Wolverhampton Road, Cheslyn Hay - The current density of housing in the area means infrastructure and amenities are already overstretched. The design of the site is on a dangerous bend. Due to heavy traffic subsidence, the road has been inaccessible for 2 way traffic for many months (temp traffic lights). More traffic would compound this. The footpath leading to the development is narrow and dangerous. Children walking to school would be at risk. The site is a natural corridor for wildlife. Bats in the trees, frogs and toads, as well as newts for example.
