Document Element: Policy DS1 – Green Belt

Respondent: Kinver Neighbourhood Plan Group

Date received: 21/12/2022 via Web

Summary:

We do not believe the current plans for building on Green Belt are justified. Apart from protection of the green belt, building over green land will increase carbon emissions relative to building on brownfield. Given the recent demographic, ec (population not rising so fast), economic (recession) and policy trends (climate change; likely reductions in targets and duty to cooperate), we believe the whole plan should be paused and reviewed, in particular with respect to building on green belt.

Change suggested by respondent:

We do not believe the current plans for building on Green Belt are justified. Apart from protection of the green belt, building over green land will increase carbon emissions relative to building on brownfield. Given the recent demographic, ec (population not rising so fast), economic (recession) and policy trends (climate change; likely reductions in targets and duty to cooperate), we believe the whole plan should be paused and reviewed, in particular with respect to building on green belt.
