Document Element: Policy NB6: Sustainable construction

Respondent: Kinver Neighbourhood Plan Group

Date received: 21/12/2022 via Web

Summary:

We welcome this policy and its requirement for zero carbon and for proven reduction in energy use. However we believe that offsetting should be avoided. If essential, we suggest it should be in the form of providing equivalent renewable energy. Treeplanting does not help our transition, and is not particularly effective unless it takes land out of arable, which then reduces food security.
